Water Resources in the East Metro Region

Bound by the Wild and Scenic St. Croix River on the east and the Mighty Mississippi River on the south, the EMWREP region contains seventy major lakes, including White Bear Lake, Forest Lake, Big Marine Lake and Lake Elmo. The region is also home to five designated trout streams, including Brown's Creek and Valley Creek, and several smaller ponds, marshes and wetlands. Eight of the ten cleanest lakes in the metro area are in Washington County.

Groundwater provides 100 percent of the drinking water, and virtually all of the water for commercial, industrial and irrigation needs in the EMWREP area. The majority of the groundwater used in the area is pumped from the Prairie Du Chien and Jordan aquifers.

Common surface water pollution problems within the EMWREP area include excess nutrients, which cause algal blooms, and mercury contamination from atmospheric deposition. Also, groundwater overuse and contamination are problems in some of the east metro communities.

**Native plantings,
raingardens
and shoreline
plantings help
keep water clean**

Resources are available through the Blue Thumb program and local EMWREP partners to help you design native gardens, create raingardens and plant shorelines. Get in touch with grants, garden blueprints, local nurseries and landscape companies, how-to guides, workshops and more!

EMWREP Garden Projects to Visit

Edgewater Park Raingarden (Woodbury)

– Located near the intersection of Edgewater Drive and Lake Road in Woodbury, at the south end of Colby Lake. The raingarden is located within Edgewater Park, between the west end of the parking lot and the lake. Project was completed in 2005.

Washington County Fairgrounds

Raingardens (Baytown Township) – Located at the Washington County Fairgrounds, along the east side of Building D. Four demonstration raingardens were installed in 2006 using different styles and plant materials. Interpretive signs located near the raingardens explain the project.

Carpenter Nature Center Raingarden

(Denmark Township) – Located in front of the main visitor center (12805 St. Croix Trail South, Hastings). This raingarden was installed in 2006 using partial cost-share assistance provided by WCD. Please call ahead to arrange for a staff person to give a guided tour. (651) 437-4359.

Washington County South Service Center

Bioretention (Cottage Grove) – Bioretention cells (engineered raingardens) are installed throughout the front parking lot at the new Washington County South Service Center. The site is located at 13000 Ravine Parkway South (off of County Road 19, about one mile north of Highway 61; across from the intersection of 90th Street South and CR 19). The project was completed in 2006.

Gunnard Olson Rain Garden (Scandia) – This small raingarden was installed in 2005 to capture runoff from a small parking area and a mowed yard. The site is located at 18804 Layton Avenue North, between Layton Avenue North and Big Marine Lake.
