

# Create beautiful gardens to keep water clean

## Design a Native Garden

Native gardens are beautiful, save water and your time.

## Create a Raingarden

Raingardens filter dirty stormwater from streets and rooftops before it enters creeks and rivers.

## Stabilize Shorelines

Long roots of native plants anchor soil, filter out pollutants and discourage geese from congregating.

Join us for a **free** Planting for Clean Water workshop at [Gander Mountain in Forest Lake \(14640 W Freeway Dr\)](#) to learn about beautiful and affordable gardens that help to keep our lakes and streams clean.

**Shoreline and Raingarden Workshop: Tue., April 13, 6:30-8pm**

Grants are available for people living in high priority areas in and around Forest Lake to install raingardens and shoreline plantings. Free design and installation assistance may also be available.
