

create beautiful gardens to keep water clean

Design a Native Garden

Native gardens are beautiful, save water and your time.

Create a Raingarden

Raingardens filter dirty stormwater from streets and rooftops before it enters creeks and rivers.

Stabilize Shorelines

Long roots of native plants anchor soil, filter out pollutants and discourage geese from congregating.

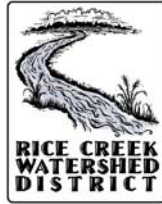

Join us for a **free** Planting for Clean Water workshop on Thursday, March 19, 6:30-8pm at the Gander Mountain in Forest Lake to see dozens of inspirational and affordable garden designs that integrate native plants and clean our waters.

After attending you can receive design and installation assistance. People living in high priority areas within their watershed may also qualify for financial incentives to install their new gardens.
