

Create beautiful gardens to keep water clean

Design a Native Garden

Native gardens are beautiful, save water and your time.

Create a Raingarden

Raingardens filter dirty stormwater from streets and rooftops before it enters creeks and rivers.

Stabilize Shorelines

Long roots of native plants anchor soil, filter out pollutants and discourage geese from congregating.

Join us for a **free** Planting for Clean Water workshop at [Woodbury City Hall](#) to learn about beautiful and affordable native gardens and raingardens that help to keep our lakes and wetlands clean.

Blue Thumb Workshop: [Tue., April 27, 6:30-8pm](#)

There are grants available for people living in high priority areas in Woodbury and other nearby communities to install raingardens and shoreline plantings. Design and installation assistance may also be available for people who attend this workshop.

Registration Required
